

Stage 2 – Verification Test for Missing Programmes in Banner

Technological University Dublin

1 Scope and Purpose

This page covers the **Stage 2 – Verification Test for Missing Programmes**. Use it when a programme *exists in your School* but is *not present* in the Banner baseline. The companion page, *Stage 2 – Verification Test for Existing Programmes*, addresses records already listed in Banner and is maintained separately.

2 Before You Start (Required Check)

1. Confirm the programme is **not** present in Banner by checking the *Verification Test for Existing Programmes* sheet.
2. Proceed here only if the programme is genuinely missing from the baseline data.
3. Have Akari open while completing the sheet, so you can cross-check module and assessment details directly.

3 How the Spreadsheet Works

All data are entered in a shared spreadsheet hosted on SharePoint (accessible through Teams or the provided link).

- Enter data for **one programme per row**. Do not duplicate TU codes.
- Use dropdown fields wherever provided (e.g. *School Responsible*, *Delivery Mode*).
- Edits are automatically saved and versioned by SharePoint.
- If a question does not cover a specific issue, use the **MPC – Comment** field to describe it. A follow-up may be requested.
- Do not delete or reorder columns.

4 Exact Column Titles (in the test spreadsheet)

Use *exactly* the following titles. Each item shows the **input type** and the instructions for completion.

Identification Fields

School Responsible

Dropdown – official School name list (no free typing).

Programme Status

Dropdown – values: **Active**, **Inactive**.

Missing TU Programme Code

Free text – TU code (e.g. TU060, TU512). Leave blank only if unknown and explain in **MPC – Comment**.

Correct Programme Title

Free text – full official title as it should appear in Banner.

Programme Checks (MP1–MP7)

MP1 – Delivery Mode

Dropdown – values: FT, PT, Apprenticeship. If unsure which mode is active, explain in **MPC – Comment**.

MP2 – Re-streamed under a different code?

Dropdown – values: Yes, No. If Yes, record the new code in **MPC – Comment** (if known). If uncertain, state that clarification is pending in **MPC**.

MP3 – Requires Award/Progression Board in Jan 2026

Dropdown – values: Yes, No. Select Yes if any student on this programme will require an award or progression decision in January 2026. If unsure, use **MPC**.

MP4 – Semester 1 modules correct in Akari

Dropdown – values: Yes, No, N.A.. Select:

- Yes – all Semester 1 modules are present and correct in Akari.
- No – at least one Semester 1 module is missing or incorrect.
- N.A. – the programme does not run in Semester 1.

If unsure, explain in **MPC – Comment**.

MP5 – Semester 2 modules correct in Akari

Dropdown – values: Yes, No, N.A.. Select:

- Yes – all Semester 2 modules are present and correct in Akari.
- No – at least one Semester 2 module is missing or incorrect.
- N.A. – the programme does not run in Semester 2.

If unsure, explain in **MPC – Comment**.

MP6 – Year-long modules correct in Akari

Dropdown – values: Yes, No, N.A.. Select:

- Yes – all Year-long modules are correct in Akari.
- No – at least one Year-long module is missing or incorrect.
- N.A. – the programme has no Year-long modules.

If unsure, explain in **MPC – Comment**.

MP7 – Assessment components correct in Akari

Dropdown – values: Yes, No. Select Yes only if assessment components and weightings (CA / Exam) match the approved configuration; otherwise No. If uncertain, describe in **MPC**.

Contact and Comments

VC10 – School contact email

Email (free text) – one TU Dublin staff address for follow-up.

MPC – Comment

Free text (multi-line) – mandatory for any response marked No, N.A., or where uncertainty exists (e.g. missing code, programme under review).

5 How to Interpret the Columns

All verification items are defined in Section 4. Use this section as your live reference when completing the spreadsheet.

- Complete one line per programme, using dropdowns where available.
- **Free text** fields should use official titles and standard TU codes.
- For any **No**, **N.A.**, or uncertain answer, explain the reason in **MPC – Comment**.
- Ensure the **VC10** field contains one valid TU Dublin staff email for follow-up.
- Do not modify column headers or their order.

6 Worked Example (Illustrative)

Missing TU Programme Code: TU060
Correct Programme Title: MSc in Computer Science
Programme Status: Active
MP1 – Delivery Mode: PT
MP4–MP7: Yes (all modules and assessments correct in Akari)
MPC – Comment: No issues identified.

One row like the above fully describes the programme and confirms Akari alignment.

7 Ambiguities and How to Resolve

This section explains common cases where multiple interpretations might occur. When uncertain, always record the reasoning in **MPC – Comment**.

Programme Status and Boards

- **Active vs Inactive:** If any students remain the programme is running this academic year, mark **Active**.
- **January 2026 board:** Select **Yes** if any progression/award processing is required in January 2026.

Modules and Assessments (Akari)

- **S1/S2 vs Year-long:** Use **N.A.** if the structure does not apply (e.g. certain apprenticeships).
- **Name vs code mismatch:** If titles look right but codes differ, choose **No** and list the correct codes in *MPC*.

Re-streamed or Renamed Programmes

If merged or replaced under a new TU code, set **MP2 = Yes** and record the new code in *MPC*.

8 Submission Checklist

Before confirming completion, ensure the following:

1. The programme does not appear in Banner (checked via the Existing Programmes sheet).
2. Each programme occupies a single row (no duplicates).
3. All MP1–MP7 fields are completed; use *N.A.* only where appropriate.

4. A valid **VC10** email is entered for follow-up.
5. The **MPC – Comment** field is filled for every **No**, **N.A.**, or uncertain response.
